Drop in safes

**Drop in safes**

All Wertheim safes with a drop in equipment can be used for the depository of bags. According to the requested insurance class (VSÖ certified – information: no VdS certification!) and the capacity of bags, the right safe can be chosen. The position of the drop in equipment can be in front or on the back of the safe.

- Safes with drop in equipment offer a **simple and secure depositing** of the daily cash receipts.
- The operating staff throws in the receipts using the **zipp-bags**, which are labelled with the particular name.
- The bags fall into the safe and can only be removed **by the owner or an authorized person**.
- A **security blocking system** prevents a later removal of a dropped bag.

*Zipp-bag*

*Drop in equipment  
LBE 150*

*Cylinder lock  
incl. 5 keys*

*Position in front*

*Example:*

*Drop in safe AMT 0600*

*EL-Lock  
La Gard Combogard 33 E*

*Security class: VSÖ EN 1*

*Capacity: approx. 15 bags  
(capacity depending on the filling of the bags, position of the drop in equipment etc.)*
