

*Depositing bank mail.*

## General information

The body which is made from galvanized sheets is rustproof. The banksided door is heat isolated, the locking with the magnetic sliding lock is trouble-free, because it's not susceptible to soiling. The boxes are space-saving dimensioned and designed for easy handling with a removable plastic-tray.

## Box equipment

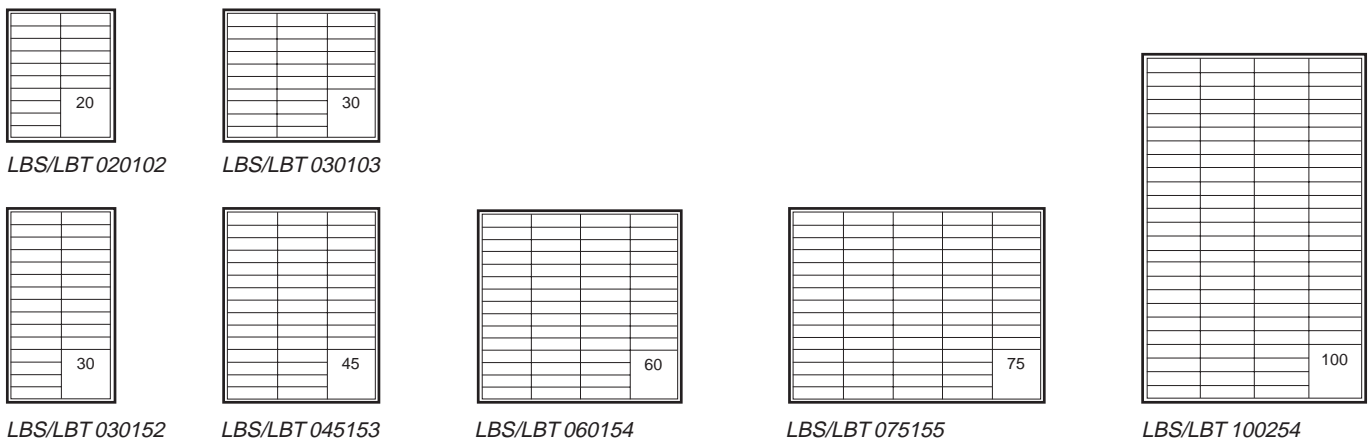

- Lock: Magnetic slide lock with 2 keys, incl. an antimagnetic key protection
- Dimensions: H x W x D = 50 x 158 x 240 mm  
(the size fits for the return of the night depository containers)
- Equipment: 1 removable tray for each box

## Surfaces

The body is made from galvanized sheets. The customer side is designed in aluminium with an anodized surface or painted in all RAL-colours. The box numbering is engraved and painted.

## Types

- LBS: Loaded from bankside
- LBT: Loaded through a lockable front door, which carries all box-doors (door in door system)
